

Accurate measurement in an uncertain world...

At TMS Europe we specialize in providing Aerospace customers with accurate calibrated instrumentation sensors thermocouples & cable, thus insuring your products meet all required specifications.

As a UKAS Accredited Laboratory for both on and off site work, you can be certain that your calibration results are not only accurate but also traceable to national standards, and that they meet the requirements of Nadcap and AMS 2750 D.

Our team of highly skilled & factory trained engineers always relish a challenge, and are always prepared to go the extra mile to insure they exceed your expectations, from instrument configuration/calibration to complete overhaul or new installation of Autoclaves Furnaces Freezers & Ovens you can rest assured that our appreciation of your business, is our business...

And as you would expect we are Internationally recognised for an organisation's internal quality management ISO 9001 Quality Assured status, thereby giving you further confidence that you are working with a quality driven company that understands your needs.
