

Portable Autoclave Calibration & Test

our PACT with you

Many professional bodies are suggesting portable autoclaves to help members meet /2030, MAC manual procedures and local authority licensing requirements.

UKAS calibration of the requirements of HM2010

As one of the areas leading UKAS accredited organisations, we are able to offer a UKAS certificate of calibration for your autoclave for time, temperature, and pressure, thus giving a **LEGAL CERTIFICATE OF TRACEABLE METROLOGY**, accredited by the United Kingdom Accreditation services for the acceptability of your portable autoclave to meet the requirements of all UK and European legislation applicable to equipment sterilisation.

The cost of this service is typically £150.00 + VAT for a Prestige Medical 2100 for example. We collect and re-deliver within 7 days and you can if you avail yourself of this service hire a Prestige Medical Autoclave already UKAS calibrated for only £100.00 per week, while yours is away.
